三、速读巧解

The Price of Oil and the Price fo Carbon

[A][41] ❶Fossil fuel prices are likely to stay "low for long." ❷ **Notwithstanding**① important recent progress in developing renewable fuel sources, low fossil fuel prices could discourage further innovation in, and adoption of, cleaner energy technologies. [41] ❸The result would be higher emissions of **carbon dioxide**② and other greenhouse gases.

[B] ❶ Policymakers should not allow low energy prices to **derail**③ the clean energy **transition**④. [45] ❷Action to restore appropriate price **incentives**⑤, **notably**⑥ through **corrective**⑦ carbon pricing, is urgently needed to lower the risk of **irreversible**⑧ and potentially devastating effects of climate change. ❸ That approach also offers **fiscal**⑨ benefits.

油价与碳价

化石燃料可能会保持"长期低价"。尽管对可再生能源的开发近年来取得重大进展，但低廉的化石燃料价格会阻碍对清洁能源技术的进一步创新和应用，其结果将会是增加二氧化碳和其他温室气体的排放。

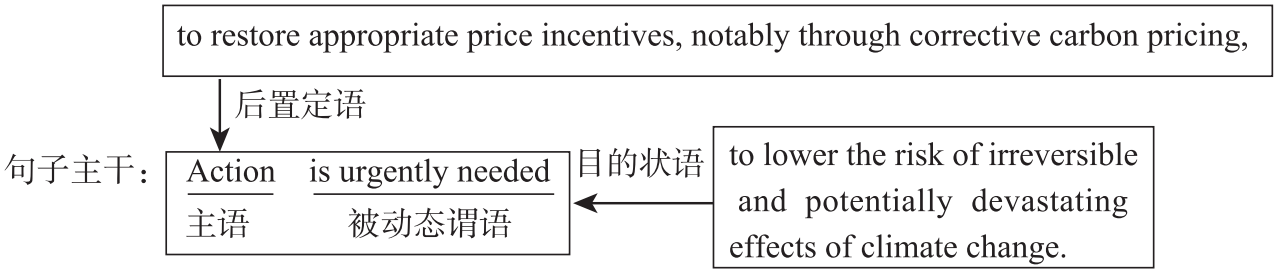

政策制定者不应任由能源低价阻碍向清洁能源过渡的进程。为降低气候变化造成不可逆转、甚至可能是灾难性影响的风险，他们急需采取行动恢复恰当的价格激励机制，特别是采用纠正性的碳定价措施。这种方法也可带来财政收益。

②**carbon dioxide** 二氧化碳

Action to restore appropriate price incentives, notably through corrective carbon pricing, is urgently needed to lower the risk of irreversible and potentially devastating effects of climate change.

·速读巧解·

[A][B]段为第一部分，提出主题："化石燃料价格持续走低"这一现象有严重负面影响，政策制定者急需采取行动恢复恰当的价格激励机制，尤其是通过碳定价的方式。

[A]段引出现象并直指后果。①句提出当前现象：化石燃料可能长期保持低价。②③句介绍现象后果(could discourage、The result would be)：化石燃料持续低价→阻碍清洁能源技术的创新和应用→增加温室气体排放。**全段核心信息为：**(1)化石燃料长期低价的趋势；(2)化石燃料长期低价的后果。

【定位词定位】41题low for a long time、higher emissions分别对应①句low for long、③句higher emissions。

【核心义匹配】①③句所述"化石燃料持续低价最终导致温室气体排放增加"与41题核心义匹配。

[B]段针对该现象提出建议。①句提出概括性的总建议：政策制定者应遏制化石燃料的低价趋势。②③句先提出具体建议"恢复恰当的价格激励，尤其是纠正性的碳定价措施"，随后指出这种措施的好处"降低气候变化的潜在风险，带来财政收益"，说明建议的合理性。**全段核心信息为：**(1)政策制定者急需采取措施；(2)措施的具体内容及预期效果。

【定位词定位】45题an appropriate level、catastrophic effects对应②句appropriate、devastating effects。

【核心义匹配】②句"政策制定者应恢复恰当的价格激励机制(即提高化石燃料价格/使用成本)以降低全球性灾难的风险"与45题核心义匹配。

[C] ❶Oil prices have dropped by over 60% since June 2014. ❷A commonly held view in the oil industry is that "the best cure for low oil prices is low oil prices." ❸The reasoning behind this saying is that low oil prices discourage investment in new production capacity, eventually shifting the oil supply curve backward and **bringing** prices back **up**① as existing oil fields—which can be **tapped**② at relatively low **marginal cost**③—are **depleted**④. ❹In fact, **in line with**⑤ past experience, capital expenditure in the oil sector has dropped sharply in many producing countries, including the United States. ❺The dynamic adjustment to low oil prices may, however, be different this time around.

自2014年6月以来，石油价格已下跌60%以上。石油行业普遍认为，"油价低的最好解决方法是低油价"。这种论断背后的理由是低油价会抑制对新产能的投资，而随着现有油田(以相对较低的边际成本被开采)枯竭，最终将导致石油供应曲线下行、油价回升。事实上，与以往经验相符的是，包括美国在内的许多石油生产国家的石油行业资本支出已大幅下降。不过，本轮对于低油价的动态调整可能会有所不同。

[D] ❶ Oil prices are expected to remain lower for longer. ❷ The **advent**⑥ of new technologies has added about 4.2 million **barrels**⑦ per day to the crude oil market, contributing to a global over-supply. [36] ❸ In addition, other factors are putting downward pressure on oil prices: change in the strategic behavior of the Organization of **Petroleum**⑧ Exporting Countries, the **projected**⑨ increase in Iranian exports, the **scaling-down**⑩ of global demand (especially from emerging markets), the long-term drop in petroleum consumption in the United States, and some displacement of oil by substitutes. ❹ These likely persistent forces, like the growth of *shale*(页岩) oil, point to a "low for long" **scenario**⑪. ❺ Futures markets, which show only a **modest**⑫ recovery of prices to around $60 a barrel by 2019, support this view.

[E] ❶ Natural gas and coal—also fossil fuels—have similarly seen price declines that look to be long-lived. ❷ Coal and natural gas are mainly used for electricity generation, whereas oil is used mostly to power transportation, yet the prices of all these energy sources are linked. ❸ The North American shale gas boom has resulted in record low prices there. ❹ The recent discovery of the giant Zohr gas field off the Egyptian coast will eventually have impact on pricing in the Mediterranean region and Europe, and there is significant development potential in many other places, notably Argentina. [39] ❺ Coal prices also are low, owing to over-supply and the scaling-down of demand, especially from China, which burns half of the world's coal.

油价预计将在更长时间内保持较低水平。新技术的出现每天为原油市场增加约420万桶原油,导致全球原油供应过剩。除此之外,其他因素也对油价构成下行压力:石油输出国组织的战略行为发生变化、伊朗出口量的预期增长、全球需求(特别是新兴市场的需求)缩水、美国石油消费的长期下滑趋势以及石油在一定程度上被其他能源所取代。这些可能持续存在的因素,如页岩油的产量增长一样,均指向一个"长期低价"的情景。期货市场显示,到2019年油价只会小幅回升到每桶约60美元,这也佐证了以上观点。

天然气和煤炭(也是化石燃料)也同样历经了看似会长期持续的价格下跌。煤炭和天然气主要用于发电,而石油则多用于为运输供能,但所有这些能源的价格都存在关联。北美页岩气产量的激增导致那里的天然气价格降至历史低位。近期在埃及沿海发现的巨型Zohr气田将最终影响地中海地区和欧洲的天然气价格,而且在很多其他地区,特别是阿根廷,也存在很大的开发潜力。而由于供应过剩和需求缩减,特别是消耗全球一半煤炭产量的中国需求减少,煤炭价格也处于低位。

[C]至[N]段为第二部分，阐释主题。

[C]至[E]段详细介绍现象。

[C]段指出油价下跌的具体情况及应对措施。①句引用数据直观展示现象：2014 年 6 月以来已下跌 60%以上。②至⑤句借 A commonly held view... The reasoning behind this saying... In fact... however...展示“介绍一种普遍看法(以低制低最有效)——解释该普遍看法背后原理(油价低→对新产能的投资积极性下降→现有油田耗尽之时油价自然回升)——以实际情况印证这一看法(美国等许多石油生产国石油行业的资本支出已大幅下降)——提示语义转折，预示新看法(此轮油价下跌会有新的调整思路，暗示将以高制低，即回应上段价格激励机制、碳定价机制)”论述逻辑。**全段核心信息为：**(1)此番油价下跌的持续时间及跌幅；(2)常规应对措施不可取。

【定位词定位】无。

[D]段指出此番油价下跌还将长久持续。①句(主旨句)总括“此番油价下跌还将持久”。②至④句分析原因，借 In addition, other factors... These likely persistent forces 实现强关联，强调指出诸多因素持续拉低油价。⑤句以期货市场数据印证这一长久低迷之势(support this view，this view 指代首句 are expected to...内容)。**全段核心信息为：**(1)此番油价下跌将呈持久之势；(2)技术造成全球性供应过剩；(3)其他诸多因素共同压低油价。

【定位词定位】36 题 A number of factors、not just for now but in the foreseeable future 分别对应文中 other factors/These... forces、for longer/for long。

【核心义匹配】③④句“诸多因素拉低油价，并使低油价长期持续”匹配 36 题核心义。

[E]段指出天然气、煤等化石燃料的价格也在持续走低。①句(主旨句)直指化石燃料价格持续走低。②句 yet 句内转折，着重强调能源价格相互影响。⑤句 also“煤炭价格走低”实质表明③④句所述为“天然气价格走低”，从而说明①句“化石燃料价格走低”这一趋势。**全段核心信息为：**(1)天然气和煤炭价格持续下跌；(2)天然气低价的原因；(3)煤炭低价的原因。

【定位词定位】39 题 The prices of coal、over-supply、decreasing demand 实质对应⑤句 Coal prices、over-supply、the scaling-down of demand。

【核心义匹配】⑤句“煤炭价格走低是因为供应过剩和需求减少”与 39 题核心义匹配。

[F] ❶Technological innovations have **unleashed**① the power of renewables such as wind, **hydro**②, solar, and *geothermal*(地热). [43] ❷Even Africa and the Middle East, home to **economies**③ that are heavily dependent on fossil fuel exports, have enormous potential to develop renewables. ❸For example, the United Arab Emirates has **endorsed**④ an **ambitious**⑤ target to draw 24% of its primary energy consumption from renewable sources by 2021.

科技创新释放了风能、水能、太阳能和地热能等可再生能源的潜力。即使是聚集着高度依赖化石燃料出口的国家的非洲和中东地区也具有开发可再生能源的巨大潜力。例如,阿拉伯联合酋长国已设立一个雄心勃勃的目标:到2021年使可再生能源占一次能源消耗的24%。

[G] ❶Progress in the development of renewables could be fragile, however, if fossil fuel prices remain low for long. [42] ❷Renewables **account for**⑥ only a small **share**⑦ of global primary energy consumption, which is still dominated by fossil fuels—30% each for coal and oil, 25% for natural gas. ❸But renewable energy will have to displace fossil fuels to a much greater extent in the future to avoid unacceptable climate risks.

不过,如果化石燃料价格长期低迷,可再生能源开发可能会裹足不前。目前,可再生能源仅占全球一次能源消耗的一小部分,后者的主要来源仍是化石燃料,其中煤炭和石油各占30%,天然气占25%。然而将来必须更大幅度地以可再生能源替代化石燃料,才能避免出现无法承受的气候风险。

[H] ❶Unfortunately, the current low prices for oil, gas, and coal may provide little incentive for research to find even cheaper substitutes for those fuels. [40] ❷There is strong evidence that both innovation and adoption of cleaner technology are strongly encouraged by higher fossil fuel prices. ❸The same is true for new technologies for **alleviating**⑧ fossil fuel emissions.

不幸的是,当前较低的石油、天然气和煤炭价格可能无法为寻找更廉价替代能源的研究提供动力。有强有力的证据表明,提高化石燃料的价格能极大推动清洁技术的创新和运用。对于减少化石燃料排放的新技术而言,同样如此。

[I] ❶The current low fossil fuel price environment will thus certainly delay the energy transition from fossil fuel to clean energy sources. ❷Unless renewables become cheap enough that substantial carbon **deposits**⑨ are left underground for a very long time, if not forever, the planet will likely **be exposed to**⑩ potentially catastrophic climate risks.

因此,当前化石燃料的低价环境无疑会延缓化石燃料向清洁能源的过渡。除非可再生能源变得非常便宜,足以使大量碳沉积物长期甚至永久滞留地下,否则地球将可能面临潜在的灾难性气候风险。

[J] ❶Some climate impacts may already be discernible. [38] ❷For example, the United Nations Children's Fund estimates that some 11 million children in Africa face hunger, disease, and water shortages as a result of the strongest *El Niño*(厄尔尼诺) weather phenomenon in decades. ❸Many scientists believe that El Niño events, caused by warming in the Pacific, are becoming more intense as a result of climate change.

一些气候影响可能已经显现出来了。例如,联合国儿童基金会估计,由于几十年以来最强的厄尔尼诺天气现象,非洲约有1100万儿童面临饥饿、疾病和用水短缺。很多科学家相信,太平洋变暖导致的厄尔尼诺事件正随着气候的变化愈益严重。

[K] ❶Nations from around the world have gathered in Paris for the United Nations Climate Change Conference, COP 21, with the goal of a universal and potentially **legally-binding**① agreement on reducing greenhouse gas emissions. ❷We need very broad participation to fully **address**② the global tragedy that results when countries fail to take into account the negative impact of their carbon emissions on the rest of the world. ❸Moreover, non-participation by nations, if sufficiently widespread, can **undermine**③ the political will of participating countries to act.

世界各国领导人聚首巴黎，参加联合国气候变化大会（COP 21），旨在就温室气体减排达成一项可能具有法律约束力的全球协议。如果各国没能考虑到其碳排放对其他国家的负面影响，就会产生全球性的悲剧，而要全面解决这一悲剧，需要各国非常广泛的参与。而且如果各国不参与的情况相当普遍，也会削弱缔约国采取行动的政治意愿。

[L] ❶The nations participating at COP 21 are focusing on **quantitative**④ emissions-reduction commitments.[37] ❷Economic reasoning shows that the least expensive way for each country is to put a price on carbon emissions. ❸The reason is that when carbon is priced, those emissions reductions that are least costly to **implement**⑤ will happen first. ❹The International Monetary Fund calculates that countries can generate substantial fiscal revenues by eliminating fossil fuel **subsidies**⑥ and **levying**⑦ carbon charges that **capture**⑧ the domestic damage caused by emissions. ❺A tax on **upstream**⑨ carbon sources is one easy way to put a price on carbon emissions, although some countries may wish to use other methods, such as emissions trading **schemes**⑩. ❻In order to maximize global welfare, every country's carbon pricing should reflect not only the purely domestic damage from emissions, but also the damage to foreign countries.

参加COP 21的国家都在关注量化减排承诺。经济分析表明，对各国而言，成本最低的方式是对碳排放定价。理由是一旦碳价确定，成本最低的那些减排措施将最先得以实行。国际货币基金组织估计，各国可通过取消化石燃料补贴以及根据排放在国内造成的危害征收碳费的方式来获得可观的财政收入。对上游碳源征税是对碳排放定价的一种简单方式，尽管有些国家可能希望使用其他方式，如排放权交易机制。为了最大化全球福利，各国的碳定价不仅应反映碳排放在本国国内造成的危害，而且也应反映对其他国家的危害。

［M］❶ Setting the right carbon price will therefore efficiently **align** the costs paid by carbon users **with**⑪ the true social opportunity cost of using carbon. ❷ By raising relative demand for clean energy sources, a carbon price would also help to align the market return to clean-energy innovation with its social return, **spurring**⑫ the **refinement**⑬ of existing technologies and the development of new ones. ❸ And it would raise the demand for technologies such as carbon capture and storage, spurring their further development. ❹ If not corrected by the appropriate carbon price, low fossil fuel prices are not accurately signaling to markets the true social profitability of clean energy. ❺ While alternative estimates of the damage from carbon emissions differ, and it's especially hard to **reckon**⑭ the likely costs of possible catastrophic climate events, most estimates suggest substantial negative effects.

因此，设定正确的碳价将有效地使碳使用者支付的成本与使用碳的真正社会机会成本相一致。通过提高对清洁能源的相对需求，碳价也有助于使清洁能源创新的市场回报与其社会回报相一致，促进现有技术的精进以及新技术的开发。另外它也可以提高对于碳捕获和储存等技术的需求，促进这些技术的进一步发展。如果没有根据合适的碳价来进行修正，化石燃料的低价就无法向市场准确体现清洁能源的社会效益。虽然关于碳排放危害的预测各有不同，而且也特别难以估算可能出现的灾难性气候事件的可能成本，但大多数预测都表明（碳排放）有重大的负面影响。

［N］❶ Direct subsidies to research and development have been adopted by some governments but are a poor substitute for a carbon price: they **do** only part of **the job**⑮, leaving in place market incentives to over-use fossil fuels and thereby add to the stock of **atmospheric**⑯ greenhouse gases without regard to the *collateral*（附带的）costs.

已有一些政府采取直接补贴研发的做法，但这种做法难以替代碳价：它们只能起到部分作用，没有动摇滥用化石燃料的市场动机，进而导致大气中温室气体存量的增加，这还没把附带成本考虑在内。
