富裕儿童和贫穷儿童的养育方式迥然不同

美国富裕家庭孩子和贫穷家庭孩子的生活差异看起来比以往任何时候都大。

皮尤研究中心一项新调查发现,富裕家庭按照日程有序安排生活,让子女跳芭蕾、踢足球、参加课外项目。这些家庭通常是双亲家庭,父母会花大量时间为子女朗读,担心子女的焦虑程度和繁忙的日程安排。

与此同时,贫穷家庭的孩子往往留守家中,或在大家庭中消磨时光。他们更有可能成长于父母表示不适宜养育子女的社区,而且父母担心他们会遭枪击,挨打或触犯法律。

[E] ❶“Early childhood experiences can be very **consequential**⑦ for children's long-term social, emotional and **cognitive**⑧ development,” said Sean Reardon, professor of poverty and inequality in education at Stanford University. ❷“And because those influence educational success and later earnings, early childhood experiences **cast a** lifelong **shadow**⑨.” ❸The cycle continues: Poorer parents have less time and fewer resources to invest in their children, which can leave children less prepared for school and work, which leads to lower earnings.

育儿方面的阶层差异正在扩大——这是不平等现象加剧的一个征兆，影响深远。不同的养育方式会让子女踏上不同的发展道路，而且可能加深社会经济方面的差距，尤其是考虑到教育与收入的强相关性。在成长过程中，孩子会学习在其所处社会经济阶层获得成功的技能，但不一定会学习其他阶层的技能。

“早期童年经历可能对儿童社会、情绪和认知方面的长期发展产生重要影响”，斯坦福大学研究贫困与教育不平等的教授肖恩·里尔登说道。“因为这些因素会影响教育的成功及以后的收入，所以早期童年经历会影响人的一生。”这一循环还将继续：较贫穷的父母可为子女投入的时间和资源较少，可能使子女对学业和工作准备不足，进而导致收入较低。

[F] [37] ❶ American parents want similar things for their children, the Pew report and past research have found: for them to be healthy and happy, honest and **ethical**①, caring and **compassionate**②. ❷ There is no best parenting style or **philosophy**③, researchers say, and across income groups, 92% of parents say they are doing a good job at **raising**④ their children. ❸ Yet they are doing it quite differently. ❹ Middle-class and higher-income parents see their children as projects in need of careful **cultivation**⑤, says Annette Lareau, whose **groundbreaking**⑥ research on the topic was published in her book *Unequal Childhoods: Class, Race and Family Life*. ❺ They try to develop their skills through close **supervision**⑦ and organized activities, and teach children to question **authority figures**⑧ and **navigate**⑨ **elite**⑩ institutions.

[G] [36] ❶ Working-class parents, meanwhile, believe their children will naturally **thrive**⑪, and give them far greater independence and time for **free play**⑫. ❷ They are taught to be **compliant**⑬ and respectful to adults. [40] ❸ There are benefits to both approaches. ❹ Working-class children are happier, more independent, complain less and are closer with family members, Ms. Lareau found. ❺ Higher-income children are more likely to declare **boredom**⑭ and expect their parents to solve their problems. ❻ Yet later on, the more affluent children end up in college and on the way to the middle class, while working-class children tend to struggle. ❼ Children from higher-income families are likely to have the skills to navigate **bureaucracies**⑮ and succeed in schools and workplaces, Ms. Lareau said.

[H] ❶ "Do all parents want the most success for their children? ❷ Absolutely," she said. ❸ "Do some strategies give children more advantages than others in institutions? ❹ Probably they do. [43] ❺ Will parents be damaging children if they have one fewer organized activity? ❻ No, I really doubt it."

这份皮尤报告与以往研究显示，美国父母对子女的期望都差不多：希望他们健康、快乐、诚实，有道德、爱心和同情心。研究人员表示，世上并不存在一种最佳的养育方式或理念；在所有收入阶层中，92%的父母认为他们在养育子女方面做得不错。但是他们的养育方式却迥然相异。安妮特·拉鲁指出，中产阶级和较高收入的父母将子女视为需精心培育的项目，她在《不平等的童年——阶层、种族和家庭生活》一书中发表了关于此话题的开创性研究发现。这些父母通过密切监督和有组织的活动来努力开发子女的技能，并教导孩子质疑权威人物，行走于精英机构。

与此同时，工薪阶层的父母则相信孩子可以自然成长，于是给予他们更多的自主权和自由玩耍的时间。孩子被教导应顺从并尊重大人。两种养育方法各有优点。拉鲁女士发现，工薪阶层的孩子更快乐，更独立，更少抱怨，与家人的关系更亲密。收入较高家庭的孩子则更可能声称感到无聊，并希望父母替他们解决问题。但在未来，较富裕家庭的孩子进入大学，轻松走上中产之路，而工薪阶层的孩子却往往要奋力拼搏。高收入家庭的孩子可能拥有行走官场的能力，并在学校和职场获得成功，拉鲁女士说道。

"是否所有父母都希望子女获得最大的成功？毫无疑问是的"，她说。"有些策略是否能让孩子比学校里其他人拥有更多优势？答案也很可能是肯定的。如果父母让孩子少参加一次组织性活动，是不是在害孩子？我对此十分怀疑。"

【定位词定位】43 题 Ms. Lareau、fewer after-class activities 分别对应②句 she(指代 Annette Lareau/Ms. Lareau)、⑤句 one fewer organized activity。

【核心义匹配】⑤⑥句“拉鲁女士认为少参加一次组织性活动不会对孩子有损害”与 43 题核心义匹配。

[I] ❶Social scientists say the differences **arise**① in part because low-income parents have less money to spend on music class or **preschool**②, and less flexible schedules to take children to museums or attend school events. ❷ **Extracurricular activities**③ reflect the differences in child rearing in the Pew survey, which was of a nationally **representative**④ **sample**⑤ of 1,807 parents. ❸Of families earning more than $75,000 a year, 84% say their children have **participated in**⑥ organized sports over the past year, 64% have done **volunteer**⑦ work and 62% have taken lessons in music, dance or art. ❹Of families earning less than $30,000, 59% of children have done sports, 37% have volunteered and 41% have taken arts classes.

社会科学家指出，差异产生的部分原因在于低收入父母可花在音乐课或者学前班的资金较少，日程不够灵活，较少带孩子去博物馆或参加学校活动。此次皮尤调查以 1807 位父母为全国代表性样本，发现课外活动体现了育儿方面的差异。年收入超过 7.5万美元的家庭中，84%的父母表示子女在过去一年里参加过有组织的体育运动，64%参与了志愿工作，62%学习了音乐、舞蹈或艺术课程。年收入不足 3 万美元的家庭中，59%的孩子参加过体育运动，37%参与了志愿活动，41%学习了艺术课程。

[J] ❶Especially in affluent families, children start young. ❷Nearly half of high-earning, college-graduate parents **enrolled**[8] their children in arts classes before they were 5, compared with one-fifth of low-income, less-educated parents. ❸Nonetheless, 20% of well-off parents say their children's schedules are too hectic, compared with 8% of poorer parents.

尤其在富裕家庭,子女很小就开始(参加各种活动)。在高收入且大学毕业的父母中,几乎一半在孩子5岁前就把他们送进艺术班,与之形成对比的是教育程度较低的低收入父母仅有五分之一这样做。不过,20%的富裕父母表示子女的日程安排过于繁忙,而收入较低的父母仅有8%这样认为。

[K] ❶ Another example is reading aloud, which studies have shown gives children bigger **vocabularies**[9] and better reading **comprehension**[10] in school. ❷71% of parents with a college degree say they do it every day, compared with 33% of those with a high school **diploma**[11] or less. ❸White parents are more likely than others to read to their children daily, as are married parents. ❹Most affluent parents enroll their children in preschool or **day care**[12], while low-income parents are more likely to depend on family members. [42] ❺**Discipline**[13] techniques **vary**[14] by education level: 8% of those with a **postgraduate**[15] degree say they often beat their children, compared with 22% of those with a high school degree or less.

另一个例子是大声朗读。研究表明,大声朗读可增加入学儿童词汇量,提高阅读理解能力。拥有大学学位的父母中,71%表示每天都为孩子朗读,而高中或更低学历的父母则只有33%这样做。白人父母与双亲家庭的父母更可能每天为子女朗读。大多数富裕的父母将子女送去学前班或日托中心,而低收入父母则更可能依靠家人(照顾子女)。不同教育层次的惩罚方式也有所不同:8%的研究生父母表示常打孩子,而高中及以下学历的父母则有22%如此。

[L] ❶ The survey also **probed**[16] attitudes and anxieties. ❷ Interestingly, parents' attitudes toward education do not seem to reflect their own educational background as much as a belief in the importance of education for **upward mobility**[17]. ❸ Most American parents say they are not concerned about their children's grades as long as they work hard. ❹But 50% of poor parents say it is extremely important to them that their children earn a college degree, compared with 39% of wealthier parents.

这一调查还探究了(家长的)态度和焦虑。有趣的是,父母对教育的态度似乎与他们自身的教育背景关系不大,而与他们是否相信教育对于向上流动性的重要作用有关。大多数美国父母表示,他们不关心子女的分数,只要他们努力就好。但是,50%的低收入父母表示子女拿到大学文凭对他们来说极其重要,富裕父母中这一比例是39%。

[M] ❶ Less-educated parents, and poorer and black and **Latino**[18] parents are more likely to believe that there is no such thing as too much involvement in a child's education. ❷Parents who are white, wealthy or college-educated say too much involvement can be bad. ❸ Parental anxieties reflect their circumstances. ❹ High-earning parents are much more likely to say they live in a good neighborhood for raising children. [38] ❺While **bullying**[19] is parents' greatest concern over all, nearly half of low-income parents worry their child will get shot, compared with one-fifth of high-income parents. ❻They are more worried about their children being **depressed**[20] or anxious.

受教育程度较低的父母、较贫困的父母,以及黑人、拉丁裔父母更倾向于相信再怎么投入子女的教育都不为过。而白人父母、富裕父母或受过大学教育的父母则表示,投入过多可能有害。父母的焦虑是家庭条件的反映。高收入父母更有可能表示,他们居住的社区适合养育孩子。欺凌是所有父母最大的担忧,但近半数的低收入父母还担心孩子遭遇枪击,而高收入父母中只有五分之一有同样的担忧。后者更担心孩子抑郁或焦虑。

［N］❶ In the Pew survey, middle-class families earning between $30,000 and $75,000 a year fell right between working-class and high-earning parents on issues like the quality of their neighborhood for raising children, participation in extracurricular activities and involvement in their children's education.

这次皮尤调查中，年收入3万至7.5万美元的中产家庭，在社区是否适合养育后代、课外活动的参与、孩子的教育投入等问题上，正好落在工薪阶层和高收入阶层父母之间。
